I guess it's fair to say there were two distinct phases to my life in West Virginia: everything that happened before October 5, 1957 and everything that happened afterward. My mother woke me early that morning, a Saturday, and said I had better get downstairs and listen to the radio. "What is it?" I mumbled from beneath the warm covers. High in the mountains, Coalwood could be a damp, cold place even in the early fall, and I would have been happy to stay there for another couple of hours, at least.

"Come listen," she said with some urgency in her voice. I peeked at her from beneath the covers. One look at her worried frown and I knew I'd better do what she said, and fast.

I threw on my clothes and went downstairs to the kitchen, where hot chocolate and buttered toast waited for me on the counter. There was only one radio station we could pick up in the morning, WELC in Welch. Usually, the only thing WELC played that early was one record dedication after the other for us high school kids. Jim, a year ahead of me and a football star, usually got several dedications every day from admiring girls. But instead of rock and roll, what I heard on the radio was a steady *beep-beep-beep* sound. Then the announcer said the tone was coming from something called *Sputnik*. It was Russian and it was in space. Mom looked from the radio to me. "What is this thing, Sonny?"

I knew exactly what it was. All the science-fiction books and Dad's magazines I'd read over the years put me in good stead to answer. "It's a space satellite," I explained. "We were supposed to launch one this year too. I can't believe the Russians beat us to it!"

She looked at me over the rim of her coffee cup. "What does it do?"

"It orbits around the world. Like the moon, only closer. It's got science stuff in it, measures things like how cold or hot it is in space. That's what ours was supposed to do, anyway."

"Will it fly over America?"

I wasn't certain about that. "I guess," I said. [...]

All day Saturday, the radio announcements continued about the Russian *Sputnik*. It seemed like each time there was news, the announcer was more excited and worried about it. There was some talk as to whether there were cameras on board, looking down at the United States, and I heard one newscaster wonder out loud if maybe an atomic bomb might be aboard. Dad was working at the mine all day, so I didn't get to hear his opinion on what was happening. I was already in bed by the time he got home, and on Sunday, he was up and gone to the mine before the sun was up. According to Mom, there was some kind of problem with one of the continuous miners¹. Some big rock had fallen on it. At church, Reverend Lanier had nothing to say about the Russians or *Sputnik* during his sermon. Talk on the church steps afterward was mostly about the football team and its undefeated season. It was taking awhile for *Sputnik* to sink in, at least in Coalwood.
